SUMMARY

A goal-oriented M.Sc. in Artificial Intelligence student with robust experience in Python, MongoDB, and Web and APP Development. Dedicated to backend technologies, actively exploring Node.js/Express.js, and excelling at building scalable, intelligent systems, such as the "IT Samachaar" curation agent. Seeking an opportunity to apply expertise in AI-driven backend projects and deliver high-signal solutions.

EDUCATION

Institution	Degree/Certificate	Year	Score
KES' B.K.Shroff College of Arts & Commerce	Masters of Science in Artificial Intelligence	Aug 2024 – Present	SGPA: 9.09 (Sem 3)
Ghanshyamdas Saraf College, Mumbai University	Bachelor of Science in Information Technology	2021 – 2024	CGPI: 8.93
Durgadevi Saraf Junior College	Higher Secondary Certificate (HSC)	2020 – 2021	90.33%

PROJECTS

1. **IT Samachaar: An Intelligent, Context-Augmented News Curation Agent**

   Tech Stack: Python, MongoDB Atlas (Vector Search), Gemini LLM (RAG Pipeline), Scikit-learn (SVM/TF-IDF), ReactJS.

   This system automatically scrapes, classifies, and summarizes technical news using AI. It solves information overload by delivering only relevant, concise, factually-grounded updates to professionals.

2. **SAMWAD – AI Communication Skill Improver Website**

   Tech Stack: HTML, CSS, Python, Flask.

   A web application developed to improve communication skills by providing AI-driven corrections for grammar, spelling, and sentiment in text.

3. **Student Performance Prediction using ML**

   Tech Stack: Machine Learning (ML), Classification Algorithms.

   This involved analyzing over 5,000 student records using classification algorithms. The goal was to accurately predict student performance outcomes.

EXPERIENCE

❖ **Software and Research Intern**
Chalbo India Pvt. Ltd., Raipur (Remote) | Feb 2025 - May 2025 (3 Months)

- Contributed to software development and research-based projects within the technical team.
- Demonstrated proactive problem-solving and team collaboration.
- Successfully applied technical skills to real-world projects, receiving appreciation for professionalism and timely delivery

❖ **Software Developer Intern**
SSPD Technology Solutions | July 2025 – Present

- Developed scalable full-stack applications using the MERN stack integrating ReactJS and Angular with Node.js/Express backends.
- Managed cloud databases via MongoDB Atlas and streamlined production deployments on Vercel to deliver high-signal software solutions.

TECHNICAL SKILLS

- Languages & Frameworks: Python, Js, C, C++, HTML5, CSS3, JavaScript (Basic), Flask, ReactJs.
- AI/ML: Machine Learning, NLP, Prompt Engineering, Sentiment Analysis, Model Evaluation, Data Science, Visualization.
- Web & Database: SQL, MongoDB, PLSQL (Basic), UI/UX, Responsive Front-End Design, Flask Development, ReactJS, Angular, Flutter, Vercel.
- Tools: VS Code, Git, Google Colab, Jupyter Notebook, MS-Excel, Power BI (Beginner), UiPath, n8n.
